

Advancing Supportive Care through Education for Nurses on Disabilities

Empowering inpatient and ED nurses to effectively care for adults and children with intellectual and developmental disabilities (I/DD)

Tiered training model led by expert advocates, nurses, and providers, available at no cost to hospitals

Option 1

Online modules

Five 20-minute didactic modules covering:

- Attitudes on I/DD and barriers to care
- Medical comorbidities
- Adapted care environments
- Mental health
- Managing a crisis

Option 2

Online modules and simulation

Online modules plus hands-on application through simulated patient scenarios
